

**Fast Affordable Protection
The Perfect Solution!**

Modular Safety Guard Railing

Create an extra measure of protection for your work environment with Allied Modular's Tufguard™ safety guardrail system.

Thoughtfully constructed from heavy-duty 10 ga. corrugated steel rails, same as those used on California highways, and mounted to universal structural steel posts. Our guardrails are made to absorb the impact exerted by forklifts or other mobile equipment.

Tufguard is available in an 18" single rail and 40" double rail system. Systems are modular in design for endless configurations and applications.

Constructed From Heavy-Duty 10 Gauge Steel:

- Maximum durability and strength.
- 30% stronger than competitors product.
- Same rail as used on California freeways.

Universal Structure Steel Posts:

- Saves money, no need to buy expensive proprietary components.
- Can be used as a corner, intermediate or end post.
- Single rail or double rail systems available.

Modular Design:

- Configures to meet any applications.
- Reuse over and over again.

Individually Packaged Pieces:

- Makes for easy stacking and shipping.
- Paint will not rub off or chip during shipping.

Powder Coated vs. Liquid Paints:

- All system components are powder coated for unsurpassed durability.
- Won't chip like competitors enameled paint. Standard Safety Yellow for easy visibility.

Now Manufacturing in California and Tennessee for Faster Delivery.

Our Safety Rail System is perfect for protecting:

- Modular Offices
- Valuable Machinery
- Racking
- Shelving
- Existing Office Complexes
- Shipping and Receiving Offices
- Warehouse Aisles
- Door Areas
- Warehouse Product Areas
- Any Warehouse Enclosure

Specifications:

- 8" x 8" x 1/2" steel base.
- 3" x 12" - 10 gauge heavy-duty steel rails.
- Universal 4" post can be used for end, connector or corner.
- Heavy duty 1/2" grade 8 connector bolts.
- Anchor bolts shall be 5/8" x 4-1/4".

Available Rail Sizes: 2', 4', 5', 6', 8' and 10'

Available Post Sizes: 18" and 40"
